Address: Sırasöğütler Mah  
1654/4 Sok. No:20, Darıca  
Kocaeli, TURKEY

- Wind Monsters LLC who taking care the environment and now developed low speed wind turbine that can generate electricity in any speed that you need. With this feature, developed wind turbine can be used in anywhere; summerhouses, farms, highway lighting, parks and gardens, hospitals, buildings in crowded cities, everywhere in a nutshell. Compare to competitor firms that are starting to generate electricity around 3-4 m/s, we can start to generate electricity at 1 m/s, at breeze shortly.
- Municipalities, Electricity Distribution Companies (like TEDAŞ, BEDAŞ, AYEDAŞ, SEDAŞ, UEDAŞ), Karayolları Genel Müdürlüğü, Hospitals, Shopping Malls, Summerhouses and Farms
- The wind turbine was developed for especially getting electricity in low speed. In Turkey, average wind speed is around 2.5 m/s. At this wind speed value no off the shelf product in industry can generate electricity. We have target to manufacture 5 wind turbines per month and transport/install to our customers.
- The developed wind turbine has validated with analyzing software and simulations. Several publications have been done in conferences in front of academic peoples.
